Dates 1936-2002
Bulk dates 1990-1998
Level of description Collection
Extent 2.70 cubic feet
Creator(s) City of Greeley Water and Sewer Department

Administrative/Biographical History

Brief History of the City of Greeley Water and Sewer Department

Although Greeley has had the Bellvue Water Treatment Plant since 1907, this collection starts with photos from the Greeley Waste Water Treatment Plant construction in the 1930s. The plant originated as a Federal Work Project constructed on city property in 1936.

A new sewer plant was constructed in 1958 at 10th Street and 1st Avenue. This new facility was expected to provide services for a population of 35,500.

The plant was again expanded in 1965. By 1971, Greeley was in a sewer crisis and the city outlined a five year expansion plan to construct additional lagoons five miles east of Greeley.

In the 1980s another expansion was planned and was completed in 1986. In 1990 Greeley's sewer plant was designated best in the US by the EPA.

Scope and Content

Collection consists mainly of photographs, with some correspondence and information regarding costs on improvements and cleanups relating to the City of Greeley Water and Sewer Plant.

System of arrangement

No original order. Order imposed by material type and year.

Conditions governing access
